

TO APPLY FOLLOW THESE STEPS:

1. Go to our Website to download application forms and program offerings & entry requirements:

www.sinu.edu.sb

2. OR Collect a hard copy of the application from SAS office, fill out relevant sections, and submit with all required documents.

3. Completed forms must be submitted with all required documents and dropped off at SAS Office, Front Desk. Please note that there is an application fee of \$50.00 that is payable to the [SINU BSP Account #: 9088870419](#) and this must be receipted at the SINU Finance Division before submitting applications.

**Dean of Faculty
Dr Eric Katovai**

**Head of School
Mr Simon Wame**

COURSE INFORMATION 2024

The Automotive Engineering department provides training for both the light vehicle and heavy vehicle industries. Courses/programs are delivered in competency-based training which aims to make students become competent automotive engineering mechanics both for light and heavy vehicles. With the changing nature of the automobile industry, the departments focus training on the new vehicle systems and function, especially with the systems and function of vehicles that are currently on our roads. The courses/programs offered at the department prepare students to work in the automotive garages and companies that offer services in automotive and the heavy industries. The department provides modern training tools and equipment that allows students to be trained on the actual industry resources that await them when they find work in the industries.

A major component of training in automotive engineering is workplace training. All students undertaking studies in automotive engineering are required to complete 4 six months of workplace training sessions before graduating.

Programs Offered

Programs offered by the Department of Automotive Engineering are as follows:

Certificate IV in Automotive Engineering (Light Vehicle) SIAUE40117

- Successful Completion of Form 6 with minimum aggregate of 18 and below.

Certificate IV in Automotive Engineering (Heavy Vehicle) SIAUE40217

- Successful Completion of Form 6 with minimum aggregate of 18 and below.

The Faculty of Science and Technology (FST) is the science and technology hub of the Solomon Islands National University (SINU). It includes courses in pure sciences, technology, TVET, and engineering, and was formed by incorporating the former School of Technology and Maritime Studies with new courses in sciences, computing, and mathematics. The FST is comprised of four schools:

1. School of Science (SOS)
2. School of Built Environment (SBE)
3. School of Transportation (SOT)
4. Solomon Islands Maritime College (SIMC)

The School of Sciences has five departments, namely biology, physics, chemistry, mathematics, and computer science. Currently, the school offers a Bachelor of Science program in biology, physics, chemistry, mathematics, and computer science.

The School of Built Environment and School of Transportation were formerly part of the Institute of Technology and have now been incorporated into the FST. The School of Built Environment has departments in civil engineering and surveying, mechanical engineering, electrical and electronic engineering, and building and construction. The School of Transportation has departments in heavy vehicle, light vehicle, and small engines.

The Solomon Islands Maritime School was formed from part of the former Institute of Maritime and Fisheries Studies and has two departments, namely nautical studies and marine engineering.

The Faculty of Science and Technology is spread across three campuses of the Solomon Islands National University. The School of Science is located at Panatina campus, while the School of Built Environment and School of Transportation are located at Kukum campus. The Solomon Islands Maritime School is located at Ranadi campus.
